

# Flu shots

## Why and where to get them

### Why get the flu shot?

Getting sick is never fun. So wouldn't it be better if you could keep yourself from getting the flu in the first place? By taking one simple step and getting a flu shot, you can lower your chances of getting sick.

- **Influenza** (also called the flu) is a serious illness and it can affect people differently. Some people with the flu become much sicker than others. A yearly seasonal flu vaccine is the best way to lower your chances of catching the seasonal flu and spreading it to others.

### Who should get vaccinated?

Everyone six months of age and older should get a flu vaccine every season. It's especially important for children under 18 months of age, adults over age 65 and others with low immune systems, since these people are at higher risk for developing serious problems caused by the flu.\*

### Where can I get a flu shot?

Anthem Blue Cross and Blue Shield covers the flu shot under your preventive care benefits at 100% when you go to a doctor in your plan. Contact your primary care doctor to get your flu shot. You can also get it at urgent care facilities, retail health clinics or walk-in doctors' offices in your plan.

### Get your flu shot

Call the number on the back of your member ID card or visit [anthem.com](https://www.anthem.com) to find an in-network provider near you.

Independent licensees of the Blue Cross and Blue Shield Association. ANTHEM is a registered trademark of Anthem Insurance Companies, Inc. The Blue Cross and Blue Shield names and symbols are registered marks of the Blue Cross and Blue Shield Association.

## Think you might have the flu?

**Flu symptoms.** Flu and cold symptoms are similar, but the flu often comes suddenly. Flu symptoms can include some or all of these:

- Fever\* or feeling feverish/chills
- Cough
- Sore throat
- Runny or stuffy nose
- Muscle or body aches
- Headaches
- Feeling very tired and worn out
- Vomiting and diarrhea, though more common in children than adults

*\* Not everyone with the flu will have a fever.*

If you have flu-like symptoms, call your doctor right away.

**Treatment.** Usually doctors use antiviral drugs to treat the flu. Antibiotics don't work because the flu is a viral infection. You need a prescription from your doctor for antiviral drugs, so see your doctor as soon as you can. It's best to go to your doctor within 48 hours after the start of flu-like symptoms.

Not everyone with the flu needs treatment. Most people get better after a few days, but others at high risk for complications should get care right away. Your doctor can tell you what's best for you.

**Visit [anthem.com](https://www.anthem.com) for more ways to get healthy – and stay healthy.**

### Where to go if you think you have the flu

See your doctor to find out if you need antiviral drugs. You can also call the 24/7 NurseLine if you're not sure what to do or where to go. The number is on the back of your ID card.

You may also get care at an urgent care facility, retail health clinic or walk-in doctor's office in your plan. To find one near you, visit [anthem.com](https://www.anthem.com).
